

PT Manage™ - Corporate Accounts

Wibby Environmental's PT Manage™ system includes the ability to establish a Corporate Account. Corporate accounts allow a corporate QA Manager to:

- View PT data for one or all network laboratories at the same time
- Search and display all historical PT data for one or all labs at the same time
- Download PT data as a CSV file for direct uploading into an Excel spreadsheet, a data base or your LIMS system

How do I create a corporate account?

Log onto www.wibby.com, and click on the "ONLINE DATA ENTRY" link on the left. Then click on the "New Account" button on the right. Type "corp" in the box that appears at the bottom of the screen. Fill in your information on the next page and click "Submit". You have now established a Corporate account.

How do I access PT data for a lab?

To be able to view a lab's PT data, call or email the lab requesting that they add you as an approved entity to PT Manage. The lab then logs onto PT Manage, clicks on the add entities link and enters your name and email address as an authorized entity. You will then be able to view, search and download the lab's PT data.

If you have any questions or need additional help in working with PT Manage™, contact Keith Ward, our IT Manager, at kward@wibby.com or by phone at 303-940-0033, ext 202.
