Instructions for: *WP PCBs in Oil (cat # PT-PCBO-WP)*

SCOPE AND APPLICATION

Wibby Environmental's WP PCBs in Oil Proficiency Testing Standard is designed to be used with promulgated EPA methods as well as applicable methods from consensus organizations such as AWWA and ASTM. You should be familiar with the method(s) before analyzing the standard. If you have any questions about the use of these standards, please contact Wibby Environmental Customer Service at 303-940-0033.

The PCBs in Oil standard is supplied as two individual standards. The standards should be prepared, analyzed and reported as separate standards. Be sure to report the results specific to the individual standard as they are **not interchangeable**.

SAMPLE PREPARATION AND ANALYSIS

1. For best results, the PT standards should be refrigerated and then brought to room temperature (near 20°C) when used.
2. The standards are supplied ready to use. However a PCB in Oil sample typically requires an extraction with hexane or other suitable solvent prior to analysis. Follow your normal standard operating procedures for the analysis of the PCBs in Oil sample.
3. Repeat the same procedure for the other ampule.

REPORTING RESULTS

1. Report all results using the Data Reporting Sheets enclosed with your standards.
2. Report results to three significant figures.
3. FAX your results to Wibby Environmental at 303-940-0043. You may also mail your results to Wibby Environmental, 6390 Joyce Drive, #100, Golden, CO, 80403. All results must be received by Wibby Environmental prior to the study closing date shown on the Data Reporting Sheets.

SAFETY

The standards are designed for use by laboratory professionals who are familiar with handling environmental reference materials as well as hazardous materials. If you have any questions about the safe handling of these standards or require a Material Safety Data Sheet (MSDS,) please contact Wibby Environmental at 303-940-0033.

QUESTIONS?

If you have any questions regarding these standards or reporting requirements, please call Wibby Environmental at 303-940-0033.
